AGENDA

Introduction

Services

Resources

Key issues for 2018

Extensive portfolio of high quality assets providing unique market position

Sites

- Almost 230 sites

DVB-T2 network

- 3 multiplexes with 98% coverage

Radio network

- Contrywide analogue FM radio network
- Radio in DVB-T2 network

Microwave network

- High-speed digital microwave backbone network + transport network for end users

B2M

- Telco service, infrastructure, site hosting

Measurements

- Measurement laboratories and equipment

Licenses

- Long-term frequency licenses in FM, UHF and SHF bands, 3 multiplexes for digital terrestrial broadcasting

HUMAN RESOURCES

Employees with high experience regarding broadcasting and wireless communication

- **Headcount:** 277+
- **Average age:** 48
- Proportion of employees with higher education: 37%
- Distribution of physical / intellectual workers: 50-50%

AGENDA

Introduction

Services

Resources

Key issues for 2018

ACTIVITIES IN 2018

Based on its countrywide networks ETV plan is to introduce new services and could provide different wireless infrastructure and maintenance services

Bandwidth
need

Transmission range

Radio over DVB-T2 network

- Programs of Radio Beograd is now available on DTT platform in MUX 1
- Radio signal is present in all allotment zones
- Countrywide covering same as digital TV

Rebuilding of FM Network

- Two capital Project – Coverage and Implementation Plan for new FM network
- 3 FM network for Public Broadcast Services
- ETV is responsible for network deployment, installation and maintenance**

Additional capacity in FX

- Increasing capacity in IP network to 480 Mbits/sec**
- Adding at least one RF channel
- Reconfiguration of existing network
- Migration to a new generation of equipment

NEW SERVICES IN FUTURE

Based on its countrywide networks ETV plan is to introduce new services and could provide different wireless infrastructure and maintenance services

T-DAB – DAB+

- DAB+ - new services, new content; up to 16 stations in one block, Hybrid Radio – Radio DNS
- In 2018 – Avala – pilot project, 2019 – 6 locations countrywide
- **ETV is responsible for network deployment and maintenance**
- Whats are the benefits of digital radio for listeners?

LPWA network, as a new opportunity

- JP ETV considering technology implement low power wide area IoT use cases
- Main goal is ti provide high quality services in the field of IOT
- Eventually a countrywide network is considered
- The basis for new services and measure (smart parking, passenger counting, smart metering – water, gas, electricity)
- Simply makes everyday taska easier

HbbTV

- HbbTV works in all DVB broadcast network
- Internet and TV is becoming united
- Internet is pushing onto TV screen in many ways...
- Many croos-linking options between broadcast and broadband
